- HL7
- FHIR API
- Custom CSV Files
- Direct Database Connection
- PDF Import
- EDI
- Claims (835 or 837)

Q: What types of organizations does Innovar Healthcare work with?

A: The Innovar team boasts experience within all tiers of the healthcare industry, from small clinics and hospitals, to multi-facility, multi-state organizations. Our work includes data in all major and common formats from many disparate sourced systems with:

- Inpatient Acute Care Hospitals And Systems
- IDN's
- Ambulatory and Outpatient Clinics
- Healthcare IT Vendors - Ranging from Large EHR Vendors to Smaller Departmental Ancillary systems
- HIE's - to include large statewide public HIE's to smaller Private HIE's
- Payers

Q: What solutions or services are best for my needs?

A: Our experts specialize in data migration, integration services. Our LightSwitch Platform can handle the labor-intensive task of managing the messaging needs of your organization.

Messaging Solutions - our Lightswitch Platform provides a cloud-based message network that can integrate information from disparate sources, in varying formats, and deliver it where you require it. An on-demand integration solution.

Integration Solutions - with the expertise of our developers, our Lightswitch Platform removes the burden of worrying about the timely, secure and accurate moving of data from here to there

and delivers a streamlined, cost-efficient approach that can be tailored to your integration needs.

Data Migration - the Lightswitch Platform enables cloud-based migration, moving data from your current system to a new system or placing your data in an alternate storage location.

Key Metrics - with our Illuminate Dashboard, get an all-in-one, real time view of the metrics important to your organization. Sort by your priority, get insight into patient location,

Q: Why would I use Innovar Healthcare for my integration as opposed to maintaining in-house?

A: Speed, timeliness, quality and cost reduction. As organizations increasingly implement new technologies, take on new challenges and patient volume, they will need to expand their interoperability across diverse systems and geographies. The ability to scale appropriately, in a cost-effective manner, then becomes the challenge. An on-demand integration solution like Innovar Healthcare solves the problem.

When outsourcing to Innovacare Healthcare, you get to rely on experts for the labor intensive tasks of migrating data, integration between facilities, payers and HIE's, as well as providing visibility to key metrics to healthcare leadership. So your team can focus on the treatment of patients.

Q: What integration engines does Innovar Healthcare work with?

A: Our experts have worked with a myriad of integration engines in the past including:

- Orion Rhapsody
- Cloverleaf
- Mirth Connect
- Ensemble
- Epic Bridges
